ISP Expands Internship Program

Naperville, IL – This year ISP will once again sponsor a summer internship program. It will run from May 19th through August 8th. This initiative is a way for ISP to give back to the community while making a difference in young people’s lives. Last year’s program was such a success that the 2008 program has been expanded to include two interns and two summer employees.

Interns Ben Schulz and Matt Benson are both majoring in business at Northern Illinois University and will graduate in 2010. Summer employee Christopher Brown will be a sophomore at the University of Wisconsin Whitewater this fall and is majoring in pre-business. Summer employee Cate Seifert is also a sophomore. She attends the University of Illinois at Urbana-Champaign and is majoring in molecular and cellular biology.

In addition to being excellent students, each of the program participants has an impressive background in community service. Cate has volunteered at Chicago’s Shedd Aquarium since 2006. Chris and Ben are both very active volunteers who have participated in a variety of initiatives to help the disadvantaged. Through his involvement with Lambda Sigma, Matt donates his time to a variety of worthy causes.

ISP takes pride in being a multifaceted corporation made up of varied individuals striving towards one goal – outstanding service, success and growth. Everyone on the ISP staff is very excited about mentoring these gifted young people.
